## Skills

C#

ASP.NET

Python

JavaScript

MySQL Database

Programming & Development tools

Communication skills

Problem solving

Teamwork & Collaboration

Time management

## Project

**Capstone Project – National Diploma in Information Technology (Software Development) Feb 2024 - Sep 2024** Designed and developed a full-featured desktop application for managing pharmacy operations.

- Built using C# (.NET), web design, and MySQL, with Dapper for data access.
- Implemented key modules: Prescription Handling, Stock and Medication Management, Doctor Referral Tracking, Employee & Walk-in Customer Records.
- Integrated authentication and role-based access control for Pharmacy Manager and Pharmacist roles.
- Demo : <https://soit-iis.mandela.ac.za/GRP-04-17>

## Certification

**National Senior Certificate**

**Slash Mark Internship– Python Certificate**

**National Diploma certificate– Nelson Mandela University**

## Communication

I have a strong ability to listen to what users need and turn those ideas into working software features. I enjoy working in a team where I can share knowledge, help train others, and collaborate to solve technical problems. I am good at taking feedback to improve my work and ensuring that my code meets the project's goals. I can explain technical details clearly and work well with others to make sure we deliver high-quality software that is easy for people to use.
